Re: Alco Steel Service, Joliet, Illinois

Dear Mr. Willard:

Please be advised that this office represents Alco Steel Service in the matter of operation of its incinerator in Joliet.

At the time of purchase of the incinerator, the supplier agreed to apply for and obtain all necessary permits for the lawful operation of the equipment sold to Alco Steel Service. It appears now; however, that no application was made for an operating permit as required under Rule 103 of the regulation. However, I have informed the supplier of the problem, and have furnished them with the appropriate forms for the application and expect that the application will be filed forthwith.

My client regrets the confusion surrounding this apparent difficiency and has instructed me to assure you that every effort will be made to comply immediately.

Yours very truly,

GALOWICH, GALOWICH, MC STEEN
& PHELAN
